

000 FORMATTING INSTRUCTIONS FOR ICLR 2025 001 RE-ALIGN WORKSHOP SUBMISSIONS

004 **Anonymous authors**

005 Paper under double-blind review

008 **ABSTRACT**

011 The abstract paragraph should be indented 1/2 inch (3 picas) on both left and right-
012 hand margins. Use 10 point type, with a vertical spacing of 11 points. The word
013 ABSTRACT must be centered, in small caps, and in point size 12. Two line spaces
014 precede the abstract. The abstract must be limited to one paragraph.

016 **1 SUBMISSION OF WORKSHOP PAPERS TO ICLR 2025 RE-ALIGN 017 WORKSHOP**

019 ICLR requires electronic submissions, processed by <https://openreview.net/>. See ICLR’s
020 website for more instructions.

022 If your paper is ultimately accepted, the statement `\iclrfinalcopy` should be inserted to adjust
023 the format to the camera ready requirements.

024 The format for the submissions is a variant of the NeurIPS format. Please read carefully the instruc-
025 tions below, and follow them faithfully.

027 **1.1 STYLE**

029 Papers to be submitted to ICLR 2025 must be prepared according to the instructions presented here.

030 Authors are required to use the ICLR \LaTeX style files obtainable at the ICLR website. Please make
031 sure you use the current files and not previous versions. Tweaking the style files may be grounds for
032 rejection.

034 **1.2 RETRIEVAL OF STYLE FILES**

036 The style files for the ICLR 2025 Re-Align Workshop are available online at:

037 <https://representational-alignment.github.io/>

039 The file `iclr2025_re-align_workshop.pdf` contains these instructions and illus-
040 trates the various formatting requirements your ICLR workshop paper must satisfy. Sub-
041 missions must be made using \LaTeX and the style files `iclr2025_conference.sty`
042 and `iclr2025_conference.bst` (to be used with \LaTeX 2e). The file
043 `iclr2025_re-align_workshop.tex` may be used as a “shell” for writing your paper.
044 All you have to do is replace the author, title, abstract, and text of the paper with your own.

045 The formatting instructions contained in these style files are summarized in sections 2, 3, and 4
046 below.

048 **2 GENERAL FORMATTING INSTRUCTIONS**

050 The text must be confined within a rectangle 5.5 inches (33 picas) wide and 9 inches (54 picas) long.
051 The left margin is 1.5 inch (9 picas). Use 10 point type with a vertical spacing of 11 points. Times
052 New Roman is the preferred typeface throughout. Paragraphs are separated by 1/2 line space, with
053 no indentation.

Paper title is 17 point, in small caps and left-aligned. All pages should start at 1 inch (6 picas) from the top of the page.

Authors' names are set in boldface, and each name is placed above its corresponding address. The lead author's name is to be listed first, and the co-authors' names are set to follow. Authors sharing the same address can be on the same line.

Please pay special attention to the instructions in section 4 regarding figures, tables, acknowledgments, and references.

There will be a strict upper limit of 10 pages for the main text of the initial submission, with unlimited additional pages for citations.

3 HEADINGS: FIRST LEVEL

First level headings are in small caps, flush left and in point size 12. One line space before the first level heading and 1/2 line space after the first level heading.

3.1 HEADINGS: SECOND LEVEL

Second level headings are in small caps, flush left and in point size 10. One line space before the second level heading and 1/2 line space after the second level heading.

3.1.1 HEADINGS: THIRD LEVEL

Third level headings are in small caps, flush left and in point size 10. One line space before the third level heading and 1/2 line space after the third level heading.

4 CITATIONS, FIGURES, TABLES, REFERENCES

These instructions apply to everyone, regardless of the formatter being used.

4.1 CITATIONS WITHIN THE TEXT

Citations within the text should be based on the `natbib` package and include the authors' last names and year (with the "et al." construct for more than two authors). When the authors or the publication are included in the sentence, the citation should not be in parenthesis using `\citet{}` (as in "See ? for more information."). Otherwise, the citation should be in parenthesis using `\citep{}` (as in "Deep learning shows promise to make progress towards AI (?).").

The corresponding references are to be listed in alphabetical order of authors, in the REFERENCES section. As to the format of the references themselves, any style is acceptable as long as it is used consistently.

4.2 FOOTNOTES

Indicate footnotes with a number¹ in the text. Place the footnotes at the bottom of the page on which they appear. Precede the footnote with a horizontal rule of 2 inches (12 picas).²

4.3 FIGURES

All artwork must be neat, clean, and legible. Lines should be dark enough for purposes of reproduction; art work should not be hand-drawn. The figure number and caption always appear after the figure. Place one line space before the figure caption, and one line space after the figure. The figure caption is lower case (except for first word and proper nouns); figures are numbered consecutively.

¹Sample of the first footnote

²Sample of the second footnote

Table 1: Sample table title

PART	DESCRIPTION
Dendrite	Input terminal
Axon	Output terminal
Soma	Cell body (contains cell nucleus)

Make sure the figure caption does not get separated from the figure. Leave sufficient space to avoid splitting the figure and figure caption.

You may use color figures. However, it is best for the figure captions and the paper body to make sense if the paper is printed either in black/white or in color.

Figure 1: Sample figure caption.

4.4 TABLES

All tables must be centered, neat, clean and legible. Do not use hand-drawn tables. The table number and title always appear before the table. See Table 1.

Place one line space before the table title, one line space after the table title, and one line space after the table. The table title must be lower case (except for first word and proper nouns); tables are numbered consecutively.

5 DEFAULT NOTATION

In an attempt to encourage standardized notation, we have included the notation file from the textbook, *Deep Learning* ? available at https://github.com/goodfeli/dlbook_notation/. Use of this style is not required and can be disabled by commenting out `math_commands.tex`.

6 FINAL INSTRUCTIONS

Do not change any aspects of the formatting parameters in the style files. In particular, do not modify the width or length of the rectangle the text should fit into, and do not change font sizes (except perhaps in the REFERENCES section; see below). Please note that pages should be numbered.

7 PREPARING POSTSCRIPT OR PDF FILES

Please prepare PostScript or PDF files with paper size “US Letter”, and not, for example, “A4”. The `-t letter` option on `dvips` will produce US Letter files.

Consider directly generating PDF files using `pdflatex` (especially if you are a MiKTeX user). PDF figures must be substituted for EPS figures, however.

Otherwise, please generate your PostScript and PDF files with the following commands:

```
dvips mypaper.dvi -t letter -Ppdf -G0 -o mypaper.ps
ps2pdf mypaper.ps mypaper.pdf
```

7.1 MARGINS IN LATEX

Most of the margin problems come from figures positioned by hand using `\special` or other commands. We suggest using the command `\includegraphics` from the `graphicx` package. Always specify the figure width as a multiple of the line width as in the example below using `.eps` graphics

```
\usepackage[dvips]{graphicx} ...
\includegraphics[width=0.8\linewidth]{myfile.eps}
```

or

```
\usepackage[pdftex]{graphicx} ...
\includegraphics[width=0.8\linewidth]{myfile.pdf}
```

for `.pdf` graphics. See section 4.4 in the graphics bundle documentation (<http://www.ctan.org/tex-archive/macros/latex/required/graphics/grfguide.ps>)

A number of width problems arise when LaTeX cannot properly hyphenate a line. Please give LaTeX hyphenation hints using the `\-` command.

AUTHOR CONTRIBUTIONS

If you’d like to, you may include a section for author contributions as is done in many journals. This is optional and at the discretion of the authors.

ACKNOWLEDGMENTS

Use unnumbered third level headings for the acknowledgments. All acknowledgments, including those to funding agencies, go at the end of the paper.

A APPENDIX

You may include other additional sections here.
